

# iSeries

## iSeries Classroom

Course Title, Code and Description	Days	Fee	Jun	Jul	Aug	Sep	Oct	Nov	Dec
<b>Query/400 Workshop (AS01GB)</b> Learn the techniques for producing quality reports quickly and efficiently, using the Query/400 tool to retrieve and analyse information held in the iSeries server database.	2 	£700		3		14			
<b>iSeries 400 Operations Navigator (AS03GB)</b> Use Operations Navigator at R520 to configure, use and manage the iSeries/AS400.	2 	£700	19						4
<b>iSeries 400 Logical Partitioning (LPAR) (AS04BGB)</b> Learn to exploit the potential of the IBM iSeries using Logical Partitioning, using system service tools to create and maintain partitions and run production workloads efficiently.	3 	£1050	21			4			
<b>iSeries RPG IV Programming - Fundamentals (AS06GB)</b> Developers who are familiar with programming in any High Level Language (HLL), but who are new to iSeries RPG IV will find this course the ideal introduction.	4 	£1400		17					
<b>iSeries RPG IV Programming - Intermediate (AS07GB)</b> Occasional or recently-trained RPG IV programmers can develop their skills to the next level of expertise, using the latest language features.	4 	£1400		31					
<b>Introduction to Java for RPG Programmers (AS081AGB)</b> This course introduces you to the Java programming language and the Java platform you use to develop Java programs. It discusses the syntax and semantics of the Java programming language, by comparing the features in RPG for which you are already familiar. While this in an intense course, you may find after you are finished that Java isn't so new and different as you might expect.	5 	£1750				25			
<b>iSeries RPG IV Programming - Advanced (AS10GB)</b> A comprehensive exposure to some of the advanced features and functions of the language for experienced RPG IV programmers. Power-programming for the discerning!	4 	£1400					16		
<b>CODE Editor and Designer for iSeries (AS12GB)</b> Learn how to use workstation (client) development tools for creating and maintaining traditional iSeries host applications. You will take advantage of the PC-based programmers-workbench to edit source code, design screen and report layouts, and debug iSeries applications.	2 	£700	Please see <a href="http://www.atstraining.co.uk">http://www.atstraining.co.uk</a> or call 08700 541144 for more details.						
<b>TCP/IP Basic Implementation (AS16GB)</b> This course will cover Transmission Control Protocol/Internet Protocol (TCP/IP) implementation on OS/400 using a mixture of lectures and hands-on labs. The course material addresses accessing the Internet as well as private intranets. A general knowledge of TCP/IP architecture is NOT required for successful completion of the course.	2 	£700	Please see <a href="http://www.atstraining.co.uk">http://www.atstraining.co.uk</a> or call 08700 541144 for more details.						
<b>iSeries HTTP Server Implementation (AS17GB)</b> This course will cover the Implementation of the HTTP Servers on the I-Series. We will look at both the Original CERN server and the Apache Server. We also cover the SSL implementation for both servers using Digital Certificates for Secure Web Serving.	2 	£700	Please see <a href="http://www.atstraining.co.uk">http://www.atstraining.co.uk</a> or call 08700 541144 for more details.						
<b>Enabling OS/400 V5 TCP/IP Security (AS18GB)</b> Learn about the Security features of OS/400 TCP/IP. This does not include Firewall technology.	3 	£1050	Please see <a href="http://www.atstraining.co.uk">http://www.atstraining.co.uk</a> or call 08700 541144 for more details.						

For advice, availability and booking please call **08700 541144**, or email us at [info@atstraining.co.uk](mailto:info@atstraining.co.uk)

Course Title, Code and Description	Days	Fee	Jun	Jul	Aug	Sep	Oct	Nov	Dec
 <b>iSeries System Operator (AS24BGB)</b> New system operators can develop basic-to-intermediate skills needed for day to day operations of the iSeries system. You'll learn the Character Driven Interface (Green Screens) and iSeries Navigator (Graphical User Interface) where applicable.	4 	£1400	26		1				
<b>iSeries 400 Advanced System Operator for V5R2 (AS27GB)</b> This Course is designed to enhance the skills of an iSeries system operator and develop additional skills in the areas of work management, CL Programming and menu creation.	3 	£1050	12		7				
 <b>iSeries 400 BRMS Implementation (AS28GB)</b> Backup and recovery – knowing how to do it is not optional! Learn once and never forget how to use BRMS to do regular and ad-hoc backups, recovery, and offsite tape backups.	4 	£1400			21				
<b>Windows Integration for iSeries (AS30GB)</b> Gain the skills needed to install, configure, manage and support Microsoft Windows Server on the iSeries Integrated xSeries Server and Direct Attached xSeries Server via Integrated xSeries Adapter. Learn the concepts, terminology and hardware that is related to the iSeries Integrated Windows environment.	3 	£1050		24					
<b>Management Central for iSeries (AS38GB)</b> This course teaches you how to control and operate multiple iSeries systems connected in a TCP/IP network using iSeries Access Express.	2 	£700	Please see <a href="http://www.atstraining.co.uk">http://www.atstraining.co.uk</a> or call 08700 541144 for more details.						
<b>iSeries Technical Certification Preparation Workshop (AS41GB)</b> A focussed course that moves experienced iSeries technical professionals to the standard required to successfully complete the latest Solutions Design and Solutions Implementation certification tests. The exams will test you on the complete range of iSeries topics, from basic operations through to the setup of BRMS and Windows on an X-series integrated server to understanding the hardware required to upgrade to the latest hardware models.	4 	£1800		3			2		
 <b>Logical Partitioning for iSeries POWER5-based servers (AS53AGB)</b> Learn basic and advanced concepts of Logical Partitioning (LPAR) for i-Series POWER-5 based servers. Begin with an overview of LPAR on the i-Series, followed by configuration planning and implementation using hands on exercises to create and implement logical partitions. Partial processors, dynamic allocation and reallocation of memory and processors plus interactive CPW buses and I/O devices. Learn to setup a Linux partition, VLAN and use of the LVT LPAR Validation Tool.	4 	£1500		17		25			
<b>Linux on IBM eServer i5 (AS561BGB)</b> Linux enables a new stream of e-business applications for the iSeries platform that complement its strength as an integrated core business solution. Learn how to plan, implement, and provide basic management for a Linux partition on an iSeries system. Learn about all aspects of Linux on iSeries in this hands-on course. Load multiple distributions of Linux in all the different environments possible on the iSeries system: hosted, non-hosted, and a mixture of both types of environments.	5 	£1750			7				
<b>Implementing AIX 5L on eServer i5 (AS571AGB)</b> The addition of AIX 5L in a logical partition (LPAR) to the IBM eServer iSeries family brings a new level of server consolidation and IT asset utilization. Learn how to plan, implement, and provide basic system management for an AIX 5L LPAR on IBM eServer i5.	4 	£1400	Please see <a href="http://www.atstraining.co.uk">http://www.atstraining.co.uk</a> or call 08700 541144 for more details.						
<b>WebSphere Application Server - Installation &amp; Configuration for iSeries (AS70GB)</b> This course teaches students how to install, configure, and maintain IBM WebSphere Application Server V5.0 Base and Express Editions for the iSeries. They will also learn how to install and deploy Java (J2EE) applications in a single machine configuration.	2 	£700				11			

Practical work included

Core course

Course Title, Code and Description	Days	Fee	Jun	Jul	Aug	Sep	Oct	Nov	Dec
<b>WebSphere Application Server - Advanced Administration for iSeries (AS73GB)</b> This course will maximize your WebSphere Application Server Administration skills on the IBM eServer iSeries platform. Learn how to configure, manage, and maintain IBM WebSphere Application Server V5.0 Network Deploy. Learn how to deploy Enterprise Java Bean applications in a multi-tier, high availability environment.	2 	£700				13			
<b>IBM WebSphere Application Server Express v 6.0 Administration on iSeries (AS771AGB)</b> This course will teach you how to install/configure WebSphere Application Server Express on iSeries, deploy and install business applications, perform regular administration tasks, determine problems and do backup and recovery of WAS Configuration, Web Applications, and Data.	2 	£700			29				
<b>Web Enabling 5250 Application Using the IBM WebFacing Tool in WDC for iSeries (AS85BGB)</b> This course introduces you to the IBM WebFacing Tool and shows you how to customize the WebFacing Tool environment to meet your requirements for an e-business application.	2 	£700	Please see <a href="http://www.atstraining.co.uk">http://www.atstraining.co.uk</a> or call 08700 541144 for more details.						
<b>iSeries Application Development using WebSphere Development Studio Client (AS86GB)</b> Learn how to use the WebSphere Development Studio Client (WDC) for iSeries workstation (client) development tools for creating and maintaining traditional iSeries host applications. You will take advantage of the PC-based programmers-workbench to edit source code, design screen and report layouts, and debug iSeries applications.	2 	£700	Please see <a href="http://www.atstraining.co.uk">http://www.atstraining.co.uk</a> or call 08700 541144 for more details.						
<b>IBM WebSphere Application Server V6.0 Administration on iSeries (AS901AGB)</b> This course teaches installation and administration of IBM HTTP Server and WebSphere Application Server on iSeries. It covers using the administrative interfaces for WebSphere administration, deploying various applications, securing applications, troubleshooting, backup and recovery, and the Network Deployment environment.	3 	£1050						29	
<b>Building RPG Web Applications - quick and easy (OE201AGB)</b> Learn how to adapt your RPG applications for access over the web. This course will allow students to develop those skills needed to implement CGI programming in an RPG IV environment - the easiest and quickest way to enter the e-Business World on the i5(iSeries).	3 	£1050	26						
<b>Introduction to ILE Concepts (OE411AGB)</b> This course teaches the student the concepts of the Integrated Language Environment (ILE) including module creation, binding, service programs and program execution. The course also covers work management considerations such as activation groups, how they are used and ILE Error Handling.	1 	£350	23						
<b>Moving to ILE RPG IV (OE85GB)</b> Skills update course for experienced RPG/400 programmers wishing to exploit RPG IV and the Integrated Language Environment. Six months RPG/400 experience expected.	3 	£1050	Please see <a href="http://www.atstraining.co.uk">http://www.atstraining.co.uk</a> or call 08700 541144 for more details.						
<b>iSeries for New Users (OE98GB)</b> Practical classroom course introduces students to the basic concepts and skills needed to become a productive user on iSeries servers.	1 	£350		31					
<b>iSeries CL Programming (OL20GB)</b> Hands-on course for iSeries students who intend to write Control Language programs to simplify server management and make effective use of system resources.	4 	£1400			7				

For advice, availability and booking please call **08700 541144**, or email us at [info@atstraining.co.uk](mailto:info@atstraining.co.uk)

Course Title, Code and Description	Days	Fee	Jun	Jul	Aug	Sep	Oct	Nov	Dec
<b>iSeries Work Management and Basic Tuning (OL23GB)</b> This Classroom course explains how to balance the workload of the I-Series system to ensure optimum performance. Specifically this course explains how to manage workloads measure system performance and tune the operating system to meet processing requirements. This course is run using Version R520 of the software	2 	£700	5						
<b>Accessing the iSeries Database Using SQL (OL37GB)</b> SQL for the iSeries – a practical introduction to the use of this powerful query and manipulation language for accessing and maintaining the DB2 UDB for iSeries database. This course is a prerequisite to CF13GB which can be used to extend your knowledge of SQL.	2 	£700	19		31				
<b>Developing iSeries Applications Using SQL (OL38GB)</b> Cross-training for experienced RPG programmers – learn to use embedded SQL as an alternative to traditional file processing.	2 	£700	21						
<b>Advanced SQL programming for i5 (iSeries) (OL391AGB)</b> This class is primarily designed to teach the students how to code SQL Triggers and SQL Stored Procedures in DB2 UDB for i5(iSeries). It also covers the object relational support for LOBs, User-Defined Types, User-Defined Functions, and Datalinks.	2 	£700	Please see <a href="http://www.atstraining.co.uk">http://www.atstraining.co.uk</a> or call 08700 541144 for more details.						
<b>i5/OS (OS/400) Technical Introduction (OL49IGB)</b> Explore the features and facilities of i5/OS (OS/400). An introduction to the rich set of functions integrated with the i5 (iSeries) operating system, developing basic skills in the use of this unique server platform.	3 	£1050		10		11			
<b>i5/iSeries Programming Facilities (OL49PGB)</b> Anyone wishing to get to grips with the iSeries developments tools, (host and client) should start here. This course introduces the many features of the programming facilities, including: WebSphere Development Studio Client for iSeries (CODE Editor and Designer) , Programming Development Manager (PDM) , Source Entry Utility (SEU) and Screen Design Aid (SDA) .	2 	£800		13					
<b>iSeries Security Implementation (OL50GB)</b> Learn to implement security measures on the iSeries platform – perform an audit and use it to update a security plan. Practical course does not cover client access, communications or network security.	2 	£700	12				16		
<b>iSeries Availability and Recovery (OL51GB)</b> For business continuity planners – complete tour of iSeries availability and recovery options and how to employ them for your own backup and recovery plan.	3 	£1050	14				18		
<b>DB2/400 Relational Database Coding and Implementation (OL62GB)</b> Practical introduction to database setup – learn to implement the DB2 UDB for iSeries relational database and find out about advanced features such as Triggers and Constraints.	2 	£700	Please see <a href="http://www.atstraining.co.uk">http://www.atstraining.co.uk</a> or call 08700 541144 for more details.						
<b>iSeries Performance Analysis and Capacity Planning (OL95GB)</b> Learn the use of the iSeries collection services to gather performance data. It also teaches how to use the IBM Performance Tools/400 of iSeries, displays, and graphics to analyse system performance. THIS COURSE IS RUN AT THE V5R2 Software release.	3 	£1050	7						

Practical work included

Core course
